

**Introduction:**

This document provides a reference to the Emerging Tasks supplemental data file. A list of columns is included, showing the column name used in each file, its data type, and a description of the column content. The following data types are used in this document:

Character: fixed-length character string  
 Character Varying: varying-length string  
 Integer: whole number

A description and data example from the file follow the list of columns. This information is provided to describe the data in this file only. It does not represent a database structure, but enables a database developer to select columns for database field and table creation with a database management system (DBMS) of choice.
